Breast cancer, screening and genetic counselling for relatives of patients 553 *abst*
Breast tumours, and frequency of chromosome band 1p13 61 *abst*

Caffey's disease, severe prenatal, fetal phenotype 569 *abst*
Cataract, mental retardation, ataxia, progressive hearing loss, and polyneuropathy, in two sisters: case report 884
cDNA hybridisation and PCR compared, for dystrophin gene deletion detection 304
Cerebrocostomandibular syndrome in four sibs, two pairs of twins: case report 704
Charcot-Marie-Tooth disease, genetic linkage, South Wales population 556 *abst*
CHARGE association
  and athyreosis: case report 207
  and balanced t(6;8)(6p8p;6q8q): case report 54
CHILD naevus is not ILVEN: letter 214
Children, testing for late onset genetic disorders 553 *abst*
Chondrodysplasia punctata, and maxillonasal dysplasia (Binder's syndrome): letter 503
Choroid plexus, tumours, familial occurrence: case report 492
Chromosomal damage in gamma irradiated lymphocytes from Alzheimer patients 62 *abst*
Chromosomes
  1p (pter→p34.1::p32.3→qter): case report 539
  1p13 band, frequency in breast tumours 61 *abst*
  2, familial microdeletion, without apparent phenotypic effect 62 *abst*
  2;21 translocation associated with Down's syndrome: case report 415
  2-based new syndrome, iris coloboma, ptosis, hypertelorism, and mental retardation: case report 342
  3, de novo ring: case report 536
  3, pericentromeric heterochromatin: letter 805
  3q2 location for BPES gene: letter 725
  t(3;17)(q26.3;q23.1) translocation (de novo), in Cornelia de Lange syndrome: case report 639
  4q syndrome duplication resulting from familial 4;14 translocation 573 *abst*
  5, close linkage with complement components 6 and 9 587
  6q syndrome duplication 574 *abst*
  t(6;8)(6p8p;6q8q), and the CHARGE syndrome: case report 54
  7q duplication resulting from maternal insertional translocation 574 *abst*
  rec(7) dup p, derived from maternal pericentric inversion inv(7)(p15q36): case report 126
  t(8;11)(q24.11;p15.5), with multiple exostoses: case report 881
  8 trisomy mosaicism with leiomyosarcoma: letter 724
  8p21.3-23.1 interstitial deletion 573 *abst*
  9(q32q34.1) deletion, de novo interstitial, with schizophrenia and mental retardation, adult male: case report 282
  9, uniparental and trisomy mosaicism 567 *abst*
  10q, proximal, partial trisomy, new case: case report 205
  12p (Pallister-Killian syndrome): syndrome of the month 122

13, deletion, in Moebius syndrome: case report 413
13, interstitial deletion (46, XY, del(13)(pter→q14.3::q22.3→ qter): case report 533
13, partial trisomy: short report 425
14, maternal uniparental disomy for 511
14q (q22q23) deletion, associated with anophthalmia, absent pituitary, and other abnormalities: case report 280
15q11.2→15q13 duplication, in five cases with different phenotypes 573 *abst*
16q duplication, three cases: short report 801
16q, paternal duplication 574 *abst*
16p variant, familial case: short report 60
17, confirmation of linkage of hyperkalaemic periodic paralysis 583
17q2 mosaic partial trisomy: case report 641
18, long arm, interstitial deletion, del(18)(q12.2q21.1), 3 cases: case report 352
19;Y translocation: short report 427
20, rare heteromorphism, and reproductive loss: short communication 477
45,X, cytogenetic and molecular study of fetuses and their parents 151
46,XY,del(1)(p22.1p31.2), two cases: case report 128
49, XXXXY syndrome, behavioural and developmental profiles 609
68,XX triploidy, first liveborn, phenotypic expression: short report 886
X, and genes for intelligence: letter 429
X, potential zinc finger transcription activator gene 550 *abst*
Xp22.2: letter 143
Xq, familial microdeletion, molecular and cytogenetic analysis 163
XX, use of probes for ZFY, SRY, and Y pseudoautosomal boundary 591
XY, use of probes for ZFY, SRY, and Y pseudoautosomal boundary 591
Y, molecular deletion map of long arm 557 *abst*
deletion resulting in Wolf-Hirschhorn syndrome, paternal origin 256
in situ suppression hybridisation in clinical cytogenetics 577
non-dysjunction, molecular studies 159
ring and dicentric, in Turner's syndrome, DNA analysis 6
CKMM, in prenatal diagnosis of myotonic dystrophy 84, 89
Cleavage-polyadenylation sequence mutation, α globin gene, in homozygous β+ thalassaemia 252
Cleft lip/palate
epidemiological and genetic study, 207 cases, Alsace, north-eastern France 324
neonates, clustering of malformations, South American families 110
sensorineural deafness, and sacral lipoma, in two brothers, possible example of disorganisation mutant: case report 135
Clinical Genetics Society meetings
Belfast, March 1991, abstracts 562
London, November 1990, abstracts 550
Cocaine exposed infant, severe manifestations of oculoauriculovertebral spectrum: short report 803
Coffin-Siris syndrome: syndrome of the month 338
Cohen syndrome, growth hormone deficiency, girl: case report 48
COL3A1, phenotypic consequences of a splicing mutation in one, and Ehlers-Danlos syndrome type IV 840
Colitis, and familial cutaneous photosensitivity, with lethal outcome 114
Collagen 1 allele, identification in prenatal diagnosis of osteogenesis imperfecta 145
Complement components 6 and 9, genes closely linked on chromosome 5 587
Congenital heart disease, in Down's syndrome, screening for, two year prospective study 566 *abst*
Connective tissues, immunological and molecular genetic characterisation of unknown structural molecule 572 *abst*
Cooley's anaemia, reproductive behaviour before and after prenatal diagnosis 523
Copper, 64–, high uptake and retention, Menkes disease 615
Cornelia de Lange syndrome
and de novo translocation t(3;17)(q26.3;q23.1): case report 639
with ring chromosome 3: letter 143
Coronary arterial atheroma, acetylator phenotypes, Saudi Arabians 192
Cosmid clones, mapping using fluorescence non-isotopic in situ hybridisation 567 *abst*
Counselling, pitfalls, craniosynostoses 117
Cranial diabetes insipidus, autosomal dominant, facial dysmorphism as marker: case report 544
Cranioectodermal dysplasia in sibs: short report 424
Craniosynostoses, counselling pitfalls 117
Cutis laxa, recurrent ctb (7)(q31) and possible laminin involvement 63 *abst*
Cystic fibrosis
birth distribution, Saguenay-Lac-St-Jean, Quebec, Canada 613
in Bulgaria: letter 807
carrier screening, attitude of young people 559 *abst*
CFTR gene, new mutation (R297Q) 571 *abst*
CFTR gene carrier testing 566 *abst*
mutation analysis 566 *abst*
different mutations, incidence, Scottish population, effects on prenatal diagnosis and genetic counselling 317
ΔF508 carrier frequency among patients with myeloid malignancy and melanoma 571 *abst*
fertile male, molecular genetic analysis: case report 420
gene, lymphocyte mRNA in detection of mutations and polymorphisms: short communication 777
recent developments 64 *abst*
genetic analysis, using amplification refractory mutation system (ARMS), the J3.11 *Msp*I polymorphism 248
leukaemia mortality among relatives of patients, Wales, update 1990 560 *abst*
molecular diagnosis 560 *abst*
mutation analysis of two populations, Northern England 571 *abst*
mutation and linkage disequilibrium analysis in genetic counselling 771
mutations, less common, association with mild phenotype 34

patient homozygous for G85E mutation has very mild disease: short communication 875
patient homozygous for nonsense mutation R553X: case report 715
patient with nonsense mutation G542X and splice site mutation 1717–1: case report 878
screening, and community genetics: letter 575
false positive results with immunoreactive trypsinogen owing to trisomy 13: letter 575
opinion of 14–16 year old students 322

D'Arcy Thompson's coordinate transformation approach, application to clinical genetics photographs using image processing techniques 472
De novo (1;7) translocation, and Wilms' tumour, in child with bilateral radial aplasia: case report 411
De novo mutation, parental origin, man: review article 217
De novo ring chromosome 3, new case with mild phenotype: case report 536
Deafness, antibiotic induced, genetic aspects, mitochondrial inheritance 79
Deletions
1p (pter→p34.1::p32.3→qter), de novo interstitial: case report 539
7q21.3, de novo interstitial, and bilateral split hand and split foot malformation: case report 479
8p21.3-23.1, interstitial 573 *abst*
9(q32q34.1), de novo interstitial, with schizophrenia and mental retardation, adult male: case report 282
13, interstitial, prognosis and adult phenotype: case report 533
13, in Moebius syndrome: case report 413
14q (q22q23) associated with anophthalmia, absent pituitary, and other abnormalities: case report 280
del(18)(q12.2q21.1), long arm of chromosome 18, 3 cases: case report 352
del(18p) syndrome, in girl with single maxillary central incisor: case report 530
Dental anomalies, developmental register, computer program 560 *abst*
Dental findings, clinical and radiographic, in X linked hypohidrotic ectodermal dysplasia 181
Dental genetic disorders, database capable of displaying dental images 561 *abst*
Dermatan sulphaturia, but normal MPS excretion, combined with mild Maroteaux-Lamy phenotype: case report 499
Diabetes insipidus, cranial, autosomal dominant, facial dysmorphism as marker: case report 544
Diabetics of Indian origin, analysis of amplified insulin gene products 97
Disorganisation, possible cause of apparent conjoint twinning: case report 712
DNA
analysis for ring and dicentric chromosomes, Turner's syndrome 6
haplotype analysis, in diagnosis of familial hypercholesterolaemia, 31 German families 865
linkage analysis in familial adenomatous polyposis 63 *abst*, 681
linked probes, in diagnosis of patterns of fragile X expression 63 *abst*
markers, for facioscapulohumeral disease on chromosome 4q 665
in neurofibromatosis type 1 558 *abst*
new, close to myotonic dystrophy locus, identification 84
in prenatal diagnosis of myotonic dystrophy 89
mitochondrial, analysis in Leber's hereditary optic neuropathy 765
polymorphisms, CF gene: short communication 777
in CF genes, genetic counselling 771
probes which show linkage to tuberous sclerosis locus 558 *abst*
Down's syndrome
de novo translocation (21q21q), parental mosaicism: short report 502
geographical distribution, Northern Region 569 *abst*
screening for congenital heart disease, two year prospective study 566 *abst*
and translocation 2;21, maternal transmission: case report 415
DS gene, human homologue: case report 138
Duchenne muscular dystrophy
alteration of carrier risk by fetal dystrophin analysis 556 *abst*
carrier detection, in female with mosaic Turner's syndrome: short report 209
carrier risk assessment using PFGE 556 *abst*
carrier status, determination by single strand conformation polymorphism analysis of deleted regions of the dystrophin locus 856
gene, Chinese, analysis of RFLPs and DNA deletions 167
truncated dystrophins in myotubes of fetuses at risk 505
Duchenne-like muscular dystrophy, autosomal recessive, dystrophin abnormality 564 *abst*
Duplications
4q syndrome resulting from familial 4;14 translocation 573 *abst*
6q syndrome 574 *abst*
7q resulting from maternal insertional translocation 574 *abst*
15q11.2→15q13 in five cases with different phenotypes 573 *abst*
Dwarfism with gloomy face, new syndrome with features of 3-M syndrome 186
Dystrophin
abnormality in autosomal recessive Duchenne-like muscular dystrophy 564 *abst*
analysis, fetal, and alteration of carrier risk in DMD 556 *abst*
gene deletions, detection, cDNA hybridisation and PCR compared 304
gene, two new PCR markers 571 *abst*
truncated, in myotubes of fetuses at risk for Duchenne muscular dystrophy 505

Ectopia lentis et pupillae, genetic aspects and differential diagnosis: case report 791
Ehlers-Danlos syndrome type IV

characterisation of glycine 910 to valine substitution in type III collagen 458
phenotypic consequences of a splicing mutation in one COL3A1 allele 840
Encephalopathy with intracerebral calcification, white matter lesions, growth hormone deficiency, microcephaly, and retinal degeneration: case report 708
Exostoses
hereditary multiple: syndrome of the month 262
multiple, t(8;11)(q24.11;p15.5): case report 881

Fabry disease, in large Nova Scotia kindred, carrier detection methods 232
Facial dysmorphism
marker of autosomal dominant cranial diabetes insipidus: case report 544
with proportionate short stature, mandibular prognathism, and short femoral necks: dysmorphology report 422
Facial measurements, newborn: letter 65
Facies, unusual, and multiple structural abnormalities, new recessive syndrome: case report 633
Faciodigitogenital syndrome, Kuwait type: letter 805
Facioscapulohumeral disease
closely linked DNA marker on chromosome 4q 665
confirmation of gene location on chromosome 4 552 *abst*
Facioscapulohumeral muscular dystrophy, genetic counselling 655
Factor VIII and factor IX genes, and associated restriction fragment length polymorphisms, Polynesians 171
Familial adenomatous polyposis
DNA linkage analysis 63 *abst*, 681
UK Northern Region genetic register 289
Familial hypercholesterolaemia, use of DNA haplotype analysis in diagnosis, 31 German families 865
Fanconi's anaemia, sister chromatid exchange evaluation in diagnosis and exclusion by induced chromosome damage analysis 468
Fits and mental retardation, incidence in tuberous sclerosis 395
Floating Harbor syndrome, and the good ship Shprintzen: letter 807
Floating-Harbor syndrome: syndrome of the month 201
Fluorescence non-isotopic in situ hybridisation, for mapping cosmid clones 567 *abst*
Fluorescence in situ hybridisation, in analysis of meiotic segregation in translocation heterozygotes 567 *abst*
Folate sensitive fragile site at 1p21.3, new: short report 356
Fragile site, folate sensitive, at 1p21.3, new: short report 356
Fragile X
expression, patterns, and role of linked DNA probes in diagnosis 63 *abst*
families, audit with respect to carrier females 555 *abst*
induction, and prometaphase chromosome analysis, single lymphocyte culture 837
molecular genetics, cytogenetics viewpoint 814
syndrome, cloning of gene for, implications: annotation 811
editorial 809
genetic localisation by linkage mapping of two microsatellite repeats *FRAXAC1* and *FRAXAC2* which immediately flank the fragile site 818
genotype prediction 824
linkage analysis using polymorphic distal Xq markers 551 *abst*
prevalence: letter 358
selection in blood cells from female carriers 830
Friedreich's ataxia locus, physical map encompassing 550 *abst*
Fried's X linked retardation, possible further case 555 *abst*
Fructose intolerance, hereditary, aldolase B mutations, Italian families 241

G542X, nonsense mutation, and splice site mutation 1717–1, in cystic fibrosis patient: case report 878
G85E mutation, cystic fibrosis patient homozygous for has very mild disease: short communication 875
Genetic counselling
analysis of problems in making reproductive decision after 194
in facioscapulohumeral muscular dystrophy 655
Genetic counsellor, non-medical, role, can UK benefit from experience in USA 567 *abst*
Genetic problems managed by non-geneticists, enquiry 567 *abst*
Genetic register, UK Northern Region, familial adenomatous polyposis coli 289
Genetics, clinical, after 1990 NHS Act 554 *abst*
Genochondromatosis: new disorder 485
Genomic DNA, from 24 year old lysate derived from washed human erythrocytes, PCR amplification: short communication 260
Genomic imprinting, and Huntington's disease inheritance 224
Gestational age and miscarriage risk of prenatal diagnostic test, variation according to genetic risk 553 *abst*
Giant platelet disorder, and congenital intestinal pseudoobstruction: case report 495
Glycine 910, characterisation to valine substitution, in type III collagen, Ehlers-Danlos syndrome type IV 458
Glycine to cysteine substitution at alpha1(I) chain of type I procollagen, in osteogenesis imperfecta 757
Glycoprotein, B–1, pregnancy specific, variation in levels in maternal serum from chromosomally abnormal pregnancies 570 *abst*
Growth hormone deficiency, girl with Cohen syndrome: case report 48

Haematometra, in Langer-Giedion syndrome: letter 644
Haemophilia A, sex ratio of mutation frequencies, coagulation assays and RFLP analysis 672
hCG, and prenatal screening for chromosome abnormalities 565 *abst*, 570 *abst*

Hearing loss
aetiology, in population of 204 institutionalised children 554 *abst*
progressive, mental retardation, cataract, ataxia, and polyneuropathy, in two sisters: case report 884
Hereditary haemochromatosis gene, isolation of YAC clones containing class I HLA genes 572 *abst*
Hereditary motor and sensory neuropathy(ies)
review article 1
X linked, linkage study with M27β 563 *abst*
Hereditary multiple exostoses: syndrome of the month 262
Hermaphrodites, true (XX), use of probes for ZFY, SRY, and Y pseudoautosomal boundary 591
HLA markers, hormones, and disease: letter 358
Holoprosencephalic fetuses, midline craniofacial skeleton 846
Holoprosencephaly-polydactyly syndrome, with features of hydrolethalus and Smith-Lemli-Opitz syndromes 297
Holt-Oram syndrome: syndrome of the month 406
Hormones, HLA markers, and disease: letter 358
Human chorionic gonadotrophin, in prenatal screening for chromosome abnormalities 565 *abst*, 570 *abst*
Hunter's syndrome, segregation and sporadic cases in families 398
Huntington's disease
age at onset, effect of line of inheritance and patient's sex 515
epidemiology 559 *abst*
linkage disequilibrium and recombination make telomeric site for gene unlikely 520
national protocol for predictive testing 559 *abst*
symptoms, patterns of inheritance, suggestive of effect of genomic imprinting 224
3'HVR probe on chromosome 16, and linkage of adult polycystic kidney disease in West Indian kindred 334
Hybridisation, chromosome in situ suppression, in clinical cytogenetics 577
Hydrocephalus and hypoglossia-hypodactyly syndrome, clue to aetiology: case report 490
Hydronephrosis
hereditary, evidence for linkage to MHC on chromosome 6p 562 *abst*
neonatally lethal, and renal agenesis in third generation of dominant pedigree with hydronephrosis, variable expression or anticipation 569 *abst*
21-Hydroxylase deficiency, de novo point mutation causing, evidence for gene conversion event 562 *abst*
Hypercholesterolaemia, familial, use of DNA haplotype analysis in diagnosis, 31 German families 865
Hypercoagulability, in Marfan syndrome: case report 349
Hyperkalaemic periodic paralysis, linkage to chromosome 17, confirmation 583
Hypertelorism, iris coloboma, ptosis, and mental retardation, new syndrome possibly localised on chromosome 2: case report 342
Hypochondroplasia, and frequency of mental retardation: letter 644
Hypoglossia-hypodactyly syndrome with hydrocephalus, clue to aetiology: case report 490
Hypohidrotic ectodermal dysplasia, X linked,
clinical and radiographic dental findings 181
sweat testing to identify female carriers 330

ICF syndrome, rare chromosome instability syndrome 63 *abst*
Ichthyosis, X linked, physical mapping of deletion breakpoints 557 *abst*
Idiopathic arterial calcification, further six cases 554 *abst*
ILVEN, and CHILD naevus: letter 214
Immunodeficiency
associated with centromeric instability and facial anomalies (ICF) 63 *abst*
ischiadic hypoplasia, renal dysfunction, and pattern of minor congenital anomalies, unknown syndrome: dysmorphology report 56
Insulin gene products, amplified, analysis, diabetics of Indian origin 97
Intelligence, genes for, on X chromosome: letter 429
Interstitial deletion 1p, two cases: case report 128
Intestinal pseudo-obstruction, congenital, associated with giant platelet disorder: case report 495
Intragenic dystrophin deletion in Becker muscular dystrophy patient, implications for functional minigenes and gene therapy 860
IQ test results and educational achievements in unselected children with sex chromosome aneuploidy 553 *abst*
Iris coloboma, ptosis, hypertelorism, and mental retardation, new syndrome possibly localised on chromosome 2: case report 342
Ischiadic hypoplasia, renal dysfunction, immunodeficiency, and pattern of minor congenital anomalies, unknown syndrome: dysmorphology report 56

Kabuki make up syndrome, Scottish child 555 *abst*
Klinefelter's syndrome, and triphalangeal thumb with delta phalanx: case report 497
Kuwait type faciodigitogenital syndrome: letter 805

Langer-Giedion syndrome, and haematometra: letter 644
Late onset genetic disorders, testing children 553 *abst*
Leber's hereditary optic neuropathy, analysis of mitochondrial DNA 765
Leiomyosarcoma, with trisomy 8 mosaicism: letter 724
LETTERS
A familial X;autosome translocation associated with Becker type muscular dystrophy? 65
CHILD naevus is not ILVEN 214

Unusual inheritance of Becker type muscular dystrophy 644
X linked complicated spastic paraplegia, MASA syndrome, and X linked hydrocephalus owing to congenital stenosis of the aqueduct of Sylvius: variable expression of the same mutation at Xq28 429
Leukaemia
acute lymphoblastic, sample characteristics and outcome of cytogenetic investigation 61 *abst*
chronic myelogenous, autologous bone marrow transplantation using long term cultures 61 *abst*
mortality among relatives of cystic fibrosis patients in Wales, update 1990 560 *abst*
tendency to develop from familial platelet disorder 555 *abst*
Linear psoriasis, somatic recombination a possible explanation: hypothesis 337
Linear skin defects and congenital microphthalmia, new syndrome at Xp22.2: letter 143
Lymphocyte mRNA as resource for detection of mutations and polymorphisms in CF gene: short communication 777

3-M syndrome, overlap with dwarfism with gloomy face 186
Malignant hyperthermia, genetic linkage analysis 562 *abst*
Marfan syndrome
genetic linkage to markers on chromosome 15 552 *abst*
and hypercoagulability: case report 349
neonatal, with congenital arachnodactyly, flexion contractures, and severe cardiac valve insufficiency: case report 267
Maroteaux-Lamy phenotype, mild, normal MPS excretion but dermatan sulphaturia: case report 499
Marriage, consanguineous, among British Pakistanis, social and genetic implications: report of meeting at Ciba Foundation, 15 January 1991 720
Maternal uniparental disomy for chromosome 14 511
Maxillonasal dysplasia (Binder's syndrome), and chondrodysplasia punctata: letter 503
Medium chain acyl-CoA dehydrogenase deficiency, molecular heterogeneity 557 *abst*
Megacystis-microcolon-intestinal hypoperistalsis syndrome, and cardiac rhabdomyomata: case report 274
Meiotic segregation in translocation heterozygotes analysed by fluorescence in situ hybridisation 567 *abst*
Menkes disease, high ^{64}Cu uptake and retention 615
Mental retardation
cataract, ataxia, progressive hearing loss, and polyneuropathy, in two sisters: case report 884
and fits, incidence in tuberous sclerosis 395
in hypochondroplasia, frequency: letter 644
iris coloboma, ptosis, and hypertelorism, new syndrome possibly localised on chromosome 2: case report 342
supraorbital sclerosis, and metaphyseal dysplasia, new syndrome or frontometaphyseal/craniometaphyseal dysplasia: case report 622
X linked, *see* X linked mental retardation
Metaphyseal dysplasia, mental retardation, and supraorbital sclerosis, new syndrome or frontometaphyseal/craniometaphyseal dysplasia: case report 622
Methylation analysis, M27β, in determination of parental origin of X;autosome translocations 63 *abst*
Microcephalic osteodysplastic primordial dwarfism type I/II in sibs: case report 795
Microcephaly-cardiomyopathy, new autosomal recessive phenotype: case report 619
Microdeletion(s)
and balanced rearrangements associated with specific clinical disorders 62 *abst*
familial, of chromosome 2 without apparent phenotypic effect 62 *abst*
of Xq, familial, molecular and cytogenetic analysis 163
Microtia and short stature, new syndrome: case report 786
Midline craniofacial skeleton, in holoprosencephalic fetuses 846
Miller syndrome
further evidence for autosomal recessive inheritance and expansion of the phenotype: case report 695
new case: case report 636
Minichromosome, supernumerary, origin 92
Minority populations, genetics, demography, and health, symposium held by the Galton Institute, September 1990: conference report 211
Miscarriages, repeated, and rare heteromorphism of chromosome 20: short communication 477

Mitochondrial inheritance of antibiotic induced deafness 79
Möbius spectrum of defects, review, and oculofacialbulbar palsy in mother and son 18
  deletion of chromosome 13: case report 413
Molecular heterogeneity, at phenylalanine hydroxylase locus, south-west England 244
Monocyte esterase deficiency in malignant neoplasia, newly described inherited phenomenon 573 *abst*
Mouse mutant disorganisation
  human homologue, does it exist: case report 138
  possible cause of apparent conjoint twinning: case report 712
  two possible human homologues: letter 645
MRX3 gene, for non-specific X linked mental retardation, localisation 372
Mucopolysaccharides excretion, normal, but dermatan sulphaturia, combined with mild Maroteaux-Lamy phenotype: case report 499
Multiple endocrine neoplasia 2A, gene probe analysis, early exclusion, diagnosis, and treatment 564 *abst*
Mutation, de novo, parental origin, man: review article 217
Myotonic dystrophy
  locus, identification of new DNA markers 84
  predictive diagnosis with flanking microsatellite markers 448
  prenatal diagnosis, using closely linked flanking markers 89

Neural tube defects
  familial, genetic basis 605
  and spondylocostal dysplasia: case report 51
Neurofibromatosis type 1
  genetic study, south-western Ontario. I Population, familial segregation of phenotype, and molecular linkage 746
  Watson syndrome, a possible subtype 752
  and 90kb DNA deletion 558 *abst*
Neuronal ceroid-lipofuscinoses, Third International Symposium, Indianapolis, Indiana, USA: conference report 284
Neuropathies, hereditary motor and sensory: review article 1
Neurosonography and pathology in Schinzel-Giedion syndrome: case report 547
Noonan-NF1 and NF1 patients, large scale mutations at NF1 locus 572 *abst*
North-Western Regional Genetic Register, first decade 558 *abst*
NOTICES
  4th International School of Medical Genetics, Italy, April 1991, 72
  23rd Annual March of Dimes Clinical Genetics Conference on Developmental and Genetic Disorders of the Central Nervous System, Vancouver, Canada, July 1991 360
  Association of Clinical Cytogeneticists, annual scientific meeting, University of Sheffield, July 1991 504
  Call for Abstracts. NATO Advanced Research Workshop on Prader-Willi Syndrome and other 15q Deletion Disorders, The Netherlands, May 1991, 71
  Clinical genetics: recent advances, course March 1992, Cardiff 504
  Conference on predictive testing for Huntington's disease, November 1991, London 576
  Genetic Services Provision—an International Perspective, satellite meeting, Washington DC, 4 October 1991 648
  Grants for research in epidermolysis bullosa 72
  International Conference on Prader-Willi Syndrome for Professionals and Parents, Netherlands, May 1991, 71
  International Seminar on Recent trends in medical biotechnology: an update, Madras, 4–7 February 1992 648
  International standing committee on human cytogenetic nomenclature, open meeting, October 1991, Washington 576
  Journal of Genetic Counseling, call for papers 808
  Rapallo II. International Symposium on First Trimester Prenatal Diagnosis, Italy, October 1991, 71
  The 8th International Congress of Human Genetics, Washington, DC, October 1991 216

Oculoauriculovertebral spectrum, severe manifestations in cocaine exposed infant: short report 803
Oculocutaneous albinism
  tyrosinase negative, nonsense mutation in tyrosinase gene of Afghan patients 464
  tyrosinase positive, with familial 46,XY,t(2;4)(q31.2;q31.22) balanced translocation: case report 482
Oculofacialbulbar palsy in mother and son, and review of Mobius spectrum of defects 18
Oesophageal/duodenal atresia with other autosomal dominant inheritance abnormalities 389
Oestriol levels, second trimester unconjugated, from chromosomally abnormal pregnancies 569 *abst*
Ohdo blepharophimosis syndrome, third case: case report 131
Oral clefts, epidemiological and genetic study, 207 cases, Alsace, north-eastern France 324
Ornithine carbamoyl transferase deficiency, arginine 109 to glutamine mutation 871
Orofaciodigital syndrome, type I, in male: case report 691
Osteogenesis imperfecta
  glycine to cysteine substitution at alpha1(I) chain of type I procollagen 757
  prenatal diagnosis by identification of concordant collagen 1 allele 145
  translation of mutation to phenotype: review article 433
Osteolysis, familial expansile, linkage analysis 562 *abst*
Ovarian cancer, allele loss, detection 564 *abst*

Pallister-Killian syndrome
  additional manifestations of cleft palate and sacral

appendage: case report 541
syndrome of the month 122
Parental origin of de novo mutation, man: review article 217
Pericentric inversion of chromosome 4, apparently homozygous, infertile man 62 *abst*
inv(7)(p15q36) maternal, rec(7) dup p child, 126
Pericentromeric heterochromatin of chromosome 3: letter 805
Peters'-plus syndrome, confirmation of autosomal recessive inheritance: case report 277
Phenylalanine hydroxylase gene, silent mutation, phenylketonuria diagnostic aid 686
Phenylalanine hydroxylase locus, molecular heterogeneity, south-west England 244
Phenylketonuria
maternal, animal model: short report 718
silent mutations in phenylalanine hydroxylase gene as diagnostic aid 686
two distinct mutations at single *Bam*HI site 38
Photosensitivity, familial cutaneous, and colitis, with lethal outcome 114
Platelet disorder, familial, with tendency to develop leukaemia 555 *abst*
Polycystic kidney disease, adult, kindred of West Indian origin, exhibits linkage with 3'HVR probe on chromosome 16 334
Polymerase chain reaction
on agarose, in cystic fibrosis analysis 559 *abst*
amplification of genomic DNA from 24 year old lysate derived from washed human erythrocytes: short communication 260
application of amplification of DNA from paraffin embedded tissue sections to linkage analysis in familial retinoblastoma 312
convenient multiplex system for detection of dystrophin gene deletions, comparison with cDNA hybridisation 304
markers in dystrophin gene, two new 571 *abst*
technology for linkage analysis, new perspective on data storage problems 560 *abst*
use in fetal sexing of amniotic fluids 570 *abst*
Polymorphic DNA probes, in analysis of origin of Turner's syndrome 156
Polyneuropathy, mental retardation, cataract, ataxia, and progressive hearing loss, in two sisters: case report 884
Polyposis coli register, two years' experience 558 *abst*
Porphyrin metabolism, evidence for second genetic locus on chromosome 11q 551 *abst*
Postaxial acrofacial dysostosis (Miller) syndrome
further evidence for autosomal recessive inheritance and expansion of the phenotype: case report 695
new case: case report 636
Prader-Willi syndrome
maternal heterodisomy 568 *abst*
molecular and cytogenetic studies 649
Northern Ireland 568 *abst*
Prenatal diagnosis
of apparently unbalanced familial translocation with normal phenotype 61 *abst*
identification of new DNA markers close to myotonic dystrophy locus 84
reproductive behaviour before and after, Cooley's anaemia 523
screening for chromosome abnormalities using maternal serum hCG and AFP levels, 565 *abst*
Prometaphase chromosome analysis, fragile X induction, single lymphocyte culture for 837
Proportionate short stature, facial dysmorphism, and other skeletal dysplasias: dysmorphology report 422
Proteus syndrome, transmission from father to son: case report 781
Pseudotrisomy 13, with features of hydrolethalus and Smith-Lemli-Opitz syndromes 297
Ptosis, iris coloboma, hypertelorism, and mental retardation, new syndrome possibly localised on chromosome 2: case report 342
Purine nucleoside phosphorylase deficiency, clinical features, enzymology, and early prenatal diagnosis 569 *abst*

R553X, nonsense mutation, cystic fibrosis patient homozygous for: case report 715
Radial aplasia, bilateral, Wilms' tumour and de novo (1;7) translocation: case report 411
Recombinant chromosome, rec(7) dup p, derived from maternal pericentric inversion inv(7)(p15q36): case report 126
REFER version 2, computer program for formatting and manipulating references from MEDLINE and REFERENCE UPDATE systems 561 *abst*
Renal dysfunction, immunodeficiency, ischiadic hypoplasia, and pattern of minor congenital anomalies, unknown syndrome: dysmorphology report 56
Restriction fragment length polymorphism, and coagulation assay data, for sex ratio of mutation frequencies in haemophilia A 672
Retinitis pigmentosa, X linked, RP2 type, genetic localisation 453
Retinoblastoma, familial, application of PCR amplification of DNA from paraffin embedded tissue sections to linkage analysis 312
Retinoschisis, X linked
contribution to carrier detection and genetic counselling 383
in male proband, apparently inherited from father's family: letter 213
Rhabdomyomata, cardiac, and megacystis-microcolon-intestinal hypoperistalsis syndrome: case report 274
Ring chromosome 3
and Cornelia de Lange syndrome: letter 143
de novo, new case 62 *abst*

S phase inhibitors and production of elongated chromosomes at metaphase of mitosis 61 *abst*
Sanfilippo syndrome type D, in two adolescent sisters 402
Schinzel-Giedion syndrome, neurosonography and pathology: case report 547

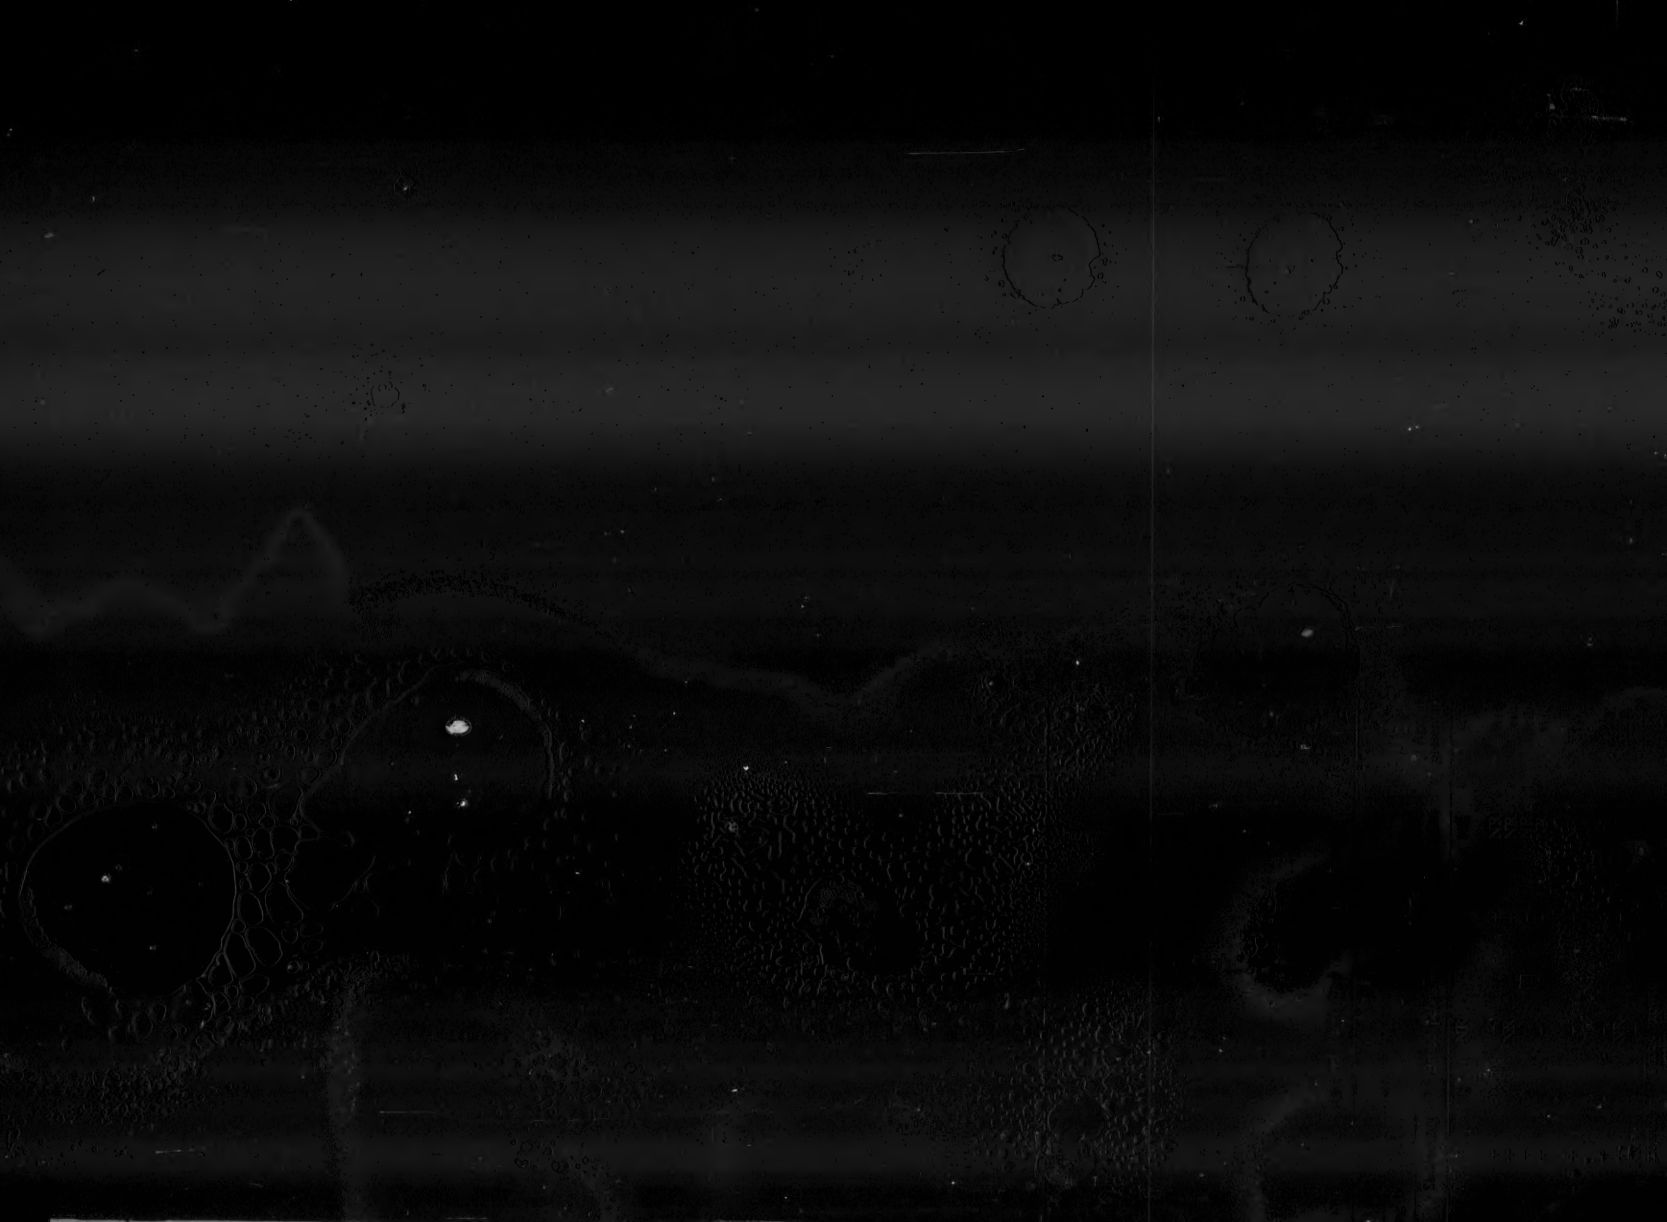
Schizophrenia
Afro-Caribbean community, family study 563 *abst*
and mental retardation, in adult male with de novo interstitial deletion 9(q32q34.1): case report 282
molecular genetics, update 563 *abst*
Sclerosis, supraorbital, mental retardation, and metaphyseal dysplasia, new syndrome or frontometaphyseal/craniometaphyseal dysplasia: case report 622
Severe combined immunodeficiency and bowing of femora, and short stature/short limb skeletal dysplasia 10
Sex ratios of probands and secondary cases in conditions of multifactorial inheritance where liability varies with sex 41
Short stature
brachydactyly, and Peters' anomaly (Peters'-plus syndrome), confirmation of autosomal recessive inheritance: case report 277
and microtia, new syndrome: case report 786
/short limb skeletal dysplasia with severe combined immunodeficiency and bowing of femora 10
Shprintzen syndrome
and Floating Harbor syndrome: letter 807
importance 596
Single strand conformation polymorphism analysis of deleted regions of the dystrophin locus, in determination of Duchenne muscular dystrophy carrier status 856
Sister chromatid exchange evaluation, in diagnosis and exclusion of Fanconi's anaemia by induced chromosome damage analysis 468
Smith-Magenis syndrome, new contiguous gene syndrome, three new cases: case report 627
Somatic recombination may explain linear psoriasis: hypothesis 337
Spastic paraplegia, X linked, MASA syndrome, and X linked hydrocephalus: letter 429
Spinal muscular atrophy (SMA), infantile, and multiple congenital bone fractures in sibs, lethal new syndrome: case report 345
Split hand and split foot malformation, bilateral, in boy with de novo interstitial deletion of 7q21.3: case report 479
Spondylocostal dysostosis, autosomal recessive, variable gene expression, large inbred kindred 27
Spondylocostal dysplasia and neural tube defects: case report 51
Squamous epithelioma, self healing, mapping 551 *abst*
SRY analysis in sex reversed patients 550 *abst*
Structural abnormalities, multiple, and unusual facies, new recessive syndrome: case report 633
Sweat testing, to identify female carriers of X linked hypohidrotic ectodermal dysplasia 330

Tay-Sachs disease
heterozygote detection, use of centrifugal analyser for automation of hexosaminidase assays with two different artificial substrates 101
splice and insertion mutations, frequency in UK Ashkenazi Jewish population 177
Testis determining factor 550 *abst*
Tetrasomy 12p: syndrome of the month 122
Thalassaemia, homozygous β+, owing to mutation in cleavage-polyadenylation sequence of human a globin gene 252
Third International Symposium on the Neuronal Ceroid-Lipofuscinoses (Batten's Disease), Indianapolis, Indiana, USA: conference report 284
Thumb, triphalangeal, with delta phalanx, in Klinefelter's syndrome: case report 497
Translocation
(1;7) de novo, and Wilms' tumour, in child with bilateral radial aplasia: case report 411
t(2;4)(q31.2;q31.22), balanced familial, 46,XY, with tyrosinase positive albinism: case report 482
2;21 associated with Down's syndrome, maternal transmission: case report 415
t(6;8)(6p8p;6q8q), and the CHARGE syndrome: case report 54
t(3;17)(q26.3;q23.1) (de novo), in Cornelia de Lange syndrome: case report 639
t(8;11)(q24.11;p15.5), with multiple exostoses: case report 881
19;Y, in child with Bannayan-Zonana phenotype: short report 427
(21q21q), de novo, Down's syndrome, parental mosaicism: short report 502
apparently unbalanced familial, with normal phenotype, prenatal diagnosis 61 *abst*
X;autosome, associated with Becker type muscular dystrophy: letter 65
determination of parental origin by M27β methylation analysis 63 *abst*
Triphalangeal thumb with delta phalanx, in Klinefelter's syndrome: case report 497
Triploidy, 68, XX, first liveborn, phenotypic expression: short report 886
Trisomies
8 mosaicism, and leiomyosarcoma: letter 724
9 mosaicism, and uniparental chromosome 9 disomy in euploid cell line 567 *abst*
10q, partial proximal, new case: case report 205
13q, partial, resulting from paternal reciprocal Yq;13q translocation: short report 425
16, non-disjunction, molecular studies 159
17q2, partial mosaic: case report 641
Tuberous sclerosis
collaborative linkage study using new approach to heterogeneity problem 558 *abst*
DNA probes which show linkage to locus 558 *abst*
incidence of fits and mental retardation 395
non-penetrance 553 *abst*: case report 417
Turner's syndrome
analysis of origin using polymorphic DNA probes 156
mosaic, female, and DMD carrier detection: short report 209
ring and dicentric chromosomes, DNA analysis 6
Twinning, apparent conjoint, possibly caused by disorganisation: case report 712
Tyrosinase gene, Afghan patients with tyrosinase negative (type IA) oculocutaneous albinism, nonsense mutation 464
Tyrosinase positive albinism with familial 46,XY, t(2;4)(q31.2;q31.22) balanced translocation: case report 482

Ultrasound, routine, value for detection of fetal abnormalities 565 *abst*
Unknown syndrome
  mental retardation with dysmorphic features, early balding, patella luxations, acromicria, and hypogonadism: dysmorphology report 140
  proportionate short stature, mandibular prognathism, and short femoral necks: dysmorphology report 422
Uveal melanomas, posterior, cytogenetic findings 61 *abst*

Velocardiofacial syndrome
  and Floating Harbor syndrome: letter 807
  importance 596
Von Hippel-Lindau disease
  genetic study 443, 555 *abst*
  locus, mapping to small region of chromosome 3p by genetic linkage 551 *abst*

Watson syndrome, is it a subtype of type 1 neurofibromatosis? 752
Weber-Cockayne epidermolysis bullosa simplex, linkage analysis 572 *abst*
Wilms' tumour and de novo (1;7) translocation, in child with bilateral radial aplasia: case report 411
Wolf-Hirschhorn syndrome, chromosomal deletion resulting in, paternal origin 256

X linked hypohidrotic ectodermal dysplasia, clinical and radiographic dental findings 181
X linked mental retardation
  Fifth International Symposium, Strasbourg, France, 12-16 August 1991, report 814
  non-specific, with classification 378
    localisation of MRX3 gene 372
  review article 361
X linked retinoschisis
  contribution to carrier detection and genetic counselling 383
  in male proband, apparently inherited from father's family: letter 213


ZFY analysis in sex reversed patients 550 *abst*
ZFY, SRY, and Y pseudoautosomal boundary probes in XX males, XX true hermaphrodites, and an XY female 591
